

Handoff Context Pack — SAMPLE

FR-009 · what the system generates per patient at handoff time · **ALL CONTENT FICTIONAL** (teaching sample)

Patient: Margaret Hale · 74 · Room 12 · **Session:** sample-2026-06-12 · **Mode:** student OFF-GOING (AI oncoming nurse receives) · **Generated from:** live chart + MAR + med board + events · This pack is simultaneously the AI counterpart's knowledge, the scoring rubric, and the debrief artifact.

Element	Ground truth	Risk
1 · Identity & situation	Margaret Hale, 74, Room 12. Admitted yesterday evening with community-acquired pneumonia; febrile overnight, more comfortable this morning on 2 L O2.	
2 · Illness severity	WATCHER — improving but oxygen-dependent with fever spikes.	HIGH
3 · Background	CAP (right lower lobe); hypertension. ALLERGY: Penicillin — rash. CODE STATUS: Full.	HIGH
4 · Current assessment	14:00 vitals: T 38.1 (↓ from 38.9) · HR 92 · RR 22 · SpO2 94% on 2 L NC · BP 128/76 — improving. WBC 14.2 (was 16.8). Crackles right base.	
5 · Meds & treatments	Ceftriaxone 1 g IV q24h — NEW , next 21:00 · Azithromycin 500 mg PO daily, next 09:00 · Acetaminophen 650 mg PO q6h PRN fever, last 13:30. No infusions. High-alert: none.	HIGH
6 · Lines / drains / access	20G PIV left forearm, day 2, site clean. No drains, no urinary catheter.	HIGH
7 · Pending items	Blood cultures x2 PENDING (drawn 06:00) · repeat CBC 06:00 tomorrow · chest physio consult requested, not yet seen.	HIGH
8 · Safety risks	Fall risk (age + overnight unsteadiness) — bed alarm ON. On O2. No isolation.	HIGH
9 · Anticipatory guidance	Watch for: work of breathing ↑ or SpO2 <92% on 2 L → escalate O2 + call team · fever >38.5 after 18:00 → check cultures, notify on-call · new rash → possible cephalosporin reaction (penicillin-allergic): hold next dose, call.	HIGH
10 · Receiver synthesis	Expected closing read-back: severity · Ceftriaxone 21:00 · cultures pending · watch-fors.	HIGH
11 · Responsibility transfer	Expected explicit acceptance ("I've got her").	

AI receiver behavior (armed from this pack): listen fully → probe 2–4 omissions prioritizing HIGH-risk rows → ask for a synthesis if not offered → accept responsibility explicitly. Containment: introduces nothing beyond this pack, never hints anything is staged.
